

Government Frameworks

Responsiv products and services are available on numerous government frameworks and marketplaces.

Frameworks aid and streamline the public sector buying process by pre-approving suppliers, products, and services with agreed terms and conditions and legal protections.

Responsiv offers include

- Professional Consulting
- Technical Support
- Responsiv Cloud Platforms
- Software Licensing

Take the strain of vetting vendors away from your procurement teams by utilising existing frameworks.

Frameworks:

G-Cloud

Easing the procurement of cloud services to promote the 'cloud-first' initiative. Responsiv list under lots 2 and 3; cloud support, and cloud software provisioning.

DOS v6

Access to suppliers who design and build bespoke digital products using an agile approach. Includes consulting and design services.

Artificial Intelligence

Scope a problem or project, understand how to solve problems using AI, and maximise the value and efficiency of processes.

Automation Marketplace

Procure intelligent automation services and solutions to maximise value, innovation, and efficiency of processes.

Spark

A technology innovation marketplace providing access to new and emerging technology. Procure technologies with the largest predicted impact over the next 5 years, including automation, AI, and IoT.
