

Readiness Assessment

with Responsiv Consulting

HOW WE WORK

Discovering your IT Estate

Partner with Responsiv to understand and plan your technology adoption project with a readiness assessment.

What is a Readiness Assessment?

A readiness assessment is a form of gap analysis that determines the current state of the project compared with the scoped outcomes to understand what needs to be done to reach the project release.

Responsiv Consultants will provide a final report assessing current capabilities and identifying challenges.

This report will provide guidance for organisations to develop a plan for successful technology adoption.

WHAT WE DO

The Process

- 1. Define the technology and its intended use:** Clearly define the technology being considered, its purpose, and how it will be integrated into the organisation's operations.
- 2. Identify key stakeholders:** Engage and involve key stakeholders to gather diverse perspectives and ensure buy-in.
- 3. Assess organisational readiness:** Evaluate the organisation's current capabilities compared with the desired outcomes.
- 4. Identify potential challenges and risks:** Analyse potential barriers to adoption, such as compatibility issues, training needs, and resistance to change.
- 5. Develop a readiness plan:** Create a detailed plan outlining the steps required to prepare for technology adoption.
- 6. Establish success metrics:** Define clear and measurable objectives to track progress and evaluate the success of the technology adoption initiative.
