NAVIGATING TECHNICAL SKILLS SHORTAGES

IBM, Red Hat, Microsoft, Open Source, and more...

OVERVIEW

Technical and IT skill shortages hinder strategy execution, compliance, and innovation.

Responsiv research has found that 35% of respondents considered the scarcity of qualified IT staff to be a significant challenge to their organisation.

Low supply and high demand for skilled resources makes the costs of hiring and maintaining skills unsustainably high.

Organisations can overcome this shortage using Responsiv.

CHALLENGES

Rising Costs of Hiring and Retention

- High demand inflates salaries and hiring costs.
- SMEs struggle to attract and retain top talent.
- High turnover increases recruitment and training costs.

Delayed or Failed IT Projects

- Skill shortages cause project delays and backlogs.
- Under-qualified staff raises risks of failed delivery.
- Lack of expertise slows digital transformation.

Risk to Innovation and Competitive Advantage

- Talent shortages hinder innovation and slow growth.
- Teams are overloaded with operational tasks.
- Tech adoption (AI, automation) lags due to skill gaps.

Increased Workload and Employee Burnout

- Overburdened IT staff face stress and dissatisfaction.
- Burnout lowers productivity and increases turnover.
- Talent loss worsens the skills gap.

RESPONSIV CAN HELP.

Access the skills you need, when you need them.

Responsiv Assist Flex Support provides ad-hoc support for your internal teams and systems.

Access expertise hourly for technical support, mentoring, short-term delivery, design and document reviews, workshops, and more.

Responsiv mentoring empowers your team by enhancing their skills and maximise time investments.

Use **Responsiv Consulting** for the added manpower to deliver strategic, backlogged, and distracting projects.

With expertise in a broad range of technologies, vendors, and methods, our specialists partner with you to successfully deliver on your IT initiatives.

By removing distracting projects such as regulatory responses, your skilled teams can focus on delivering true competitive value.

CONCLUSION

Responsiv has the experience and expertise to successfully deliver IT projects, manage your environments, and mentor at all levels.

Our offerings allow you to use this expertise in the way that best suits you; to your timelines, budgets, and strategic goals.
