OPEN FINANCE

WITHOUT BREAKING THE BANK

Open Banking and Open Finance aren't just about connecting to bank APIs; they're about building secure, reliable, and compliant financial ecosystems. Poor implementation can expose organisations to regulatory penalties, security breaches, and customer trust issues.

RESPONSIV

The Responsiv Open Finance Gateway (OFG) is the evolution of our award-winning Open Banking platform, designed to meet the expanding scope of Open Finance regulations.

OFG is the secure intermediary between your internal systems and Third-Party Payment Providers (TPPs), delivering enterprise-grade resilience and security standards expected by Financial Services.

Open Banking and Open Finance shouldn't be a compliance burden.

With this adaptable platform, Responsiv enables you to focus on customer value and product development while we handle the complex technical and regulatory infrastructure

CORE CAPABILITIES

- API orchestration, security, and aggregation
- Consent and identity management
- Developer sandbox and portal
- Usage-based billing and monetisation
- Audit logging and compliance reporting

KEY BENEFITS

UK MANAGED SERVICE

Managed and hosted in the UK to ensure data compliance and peace of mind.

BUILT-IN COMPLIANCE AND SECURITY

Integrated consent management, SCA, and audit controls reduce regulatory risk.

FLEXIBLE API DEVELOPMENT

Configurable API Packs supporting various Open Banking UK standards, Dutch Tax AML APIs, and more.

COST-EFFECTIVE COMPLIANCE

Don't break the bank in the name of compliance.

A NEW WAY OF THINKING

What if compliance became a driver for innovation? The organisations that move early will lead the Open Finance market.

By embedding security, consent, and transparency at the core of your architecture, the Responsiv Open Finance Gateway turns regulatory requirements into a launchpad for new products, trusted partnerships, and sustainable growth.

Start your Open Finance transformation, today!
